HEALTH WORLD DRAFT

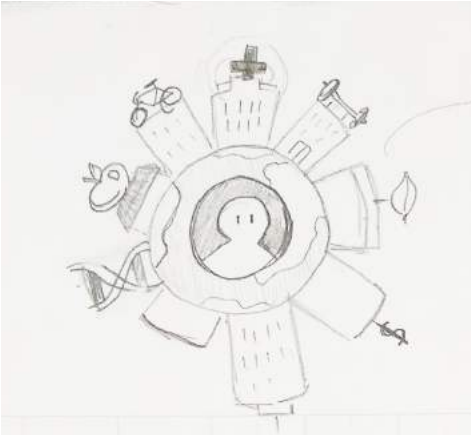

PATRICIA NGUYEN, ERIC BENOIT, JUHAN SONIN – 09.MAY.2019 

Without health. We are nothing.

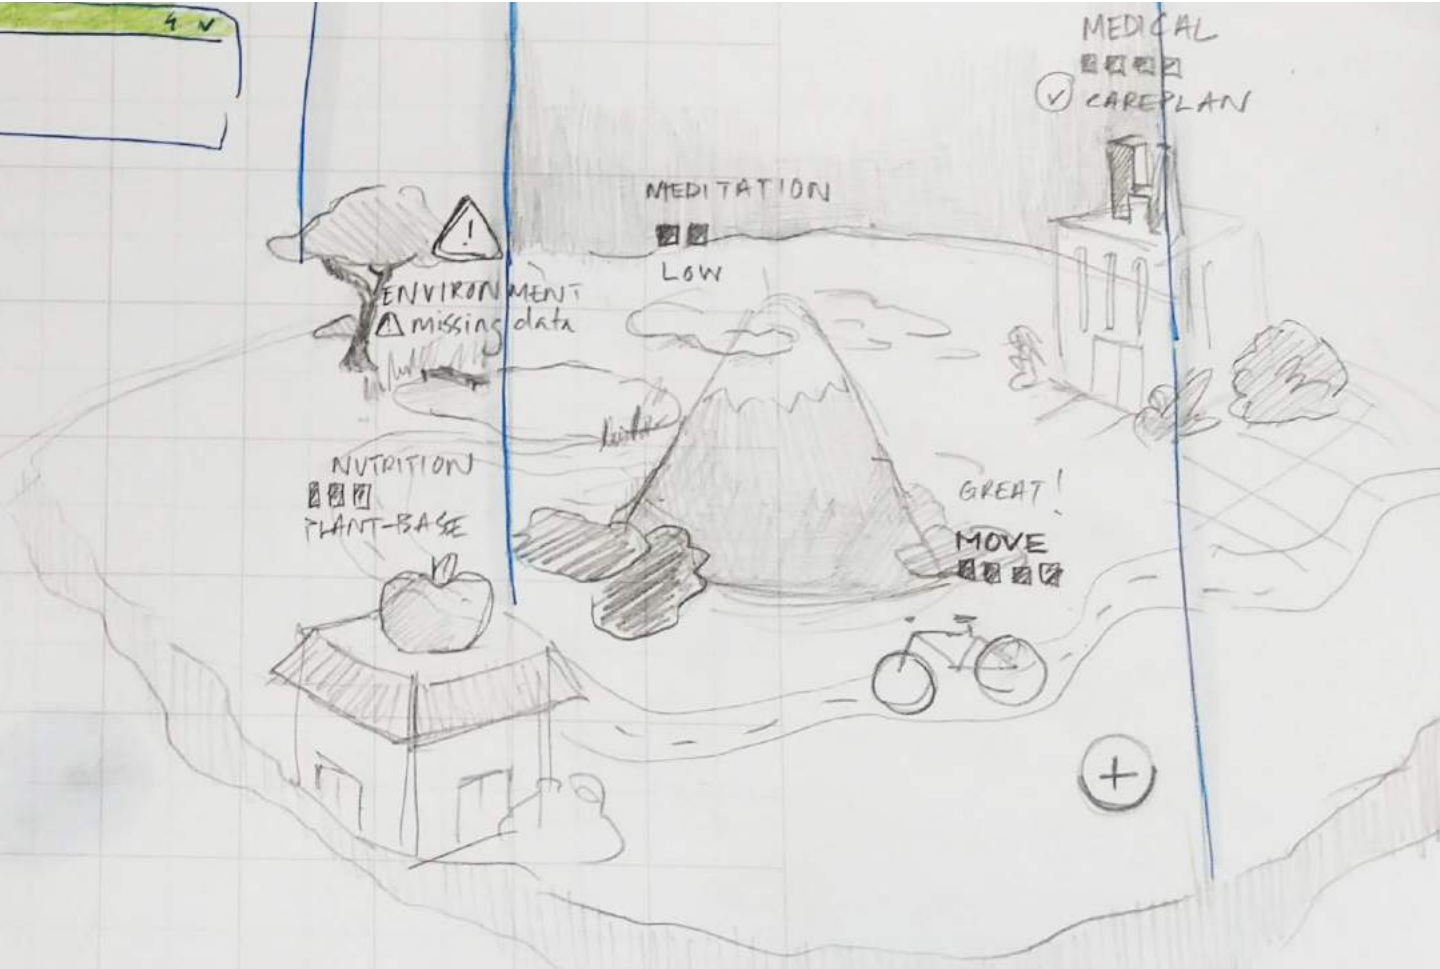

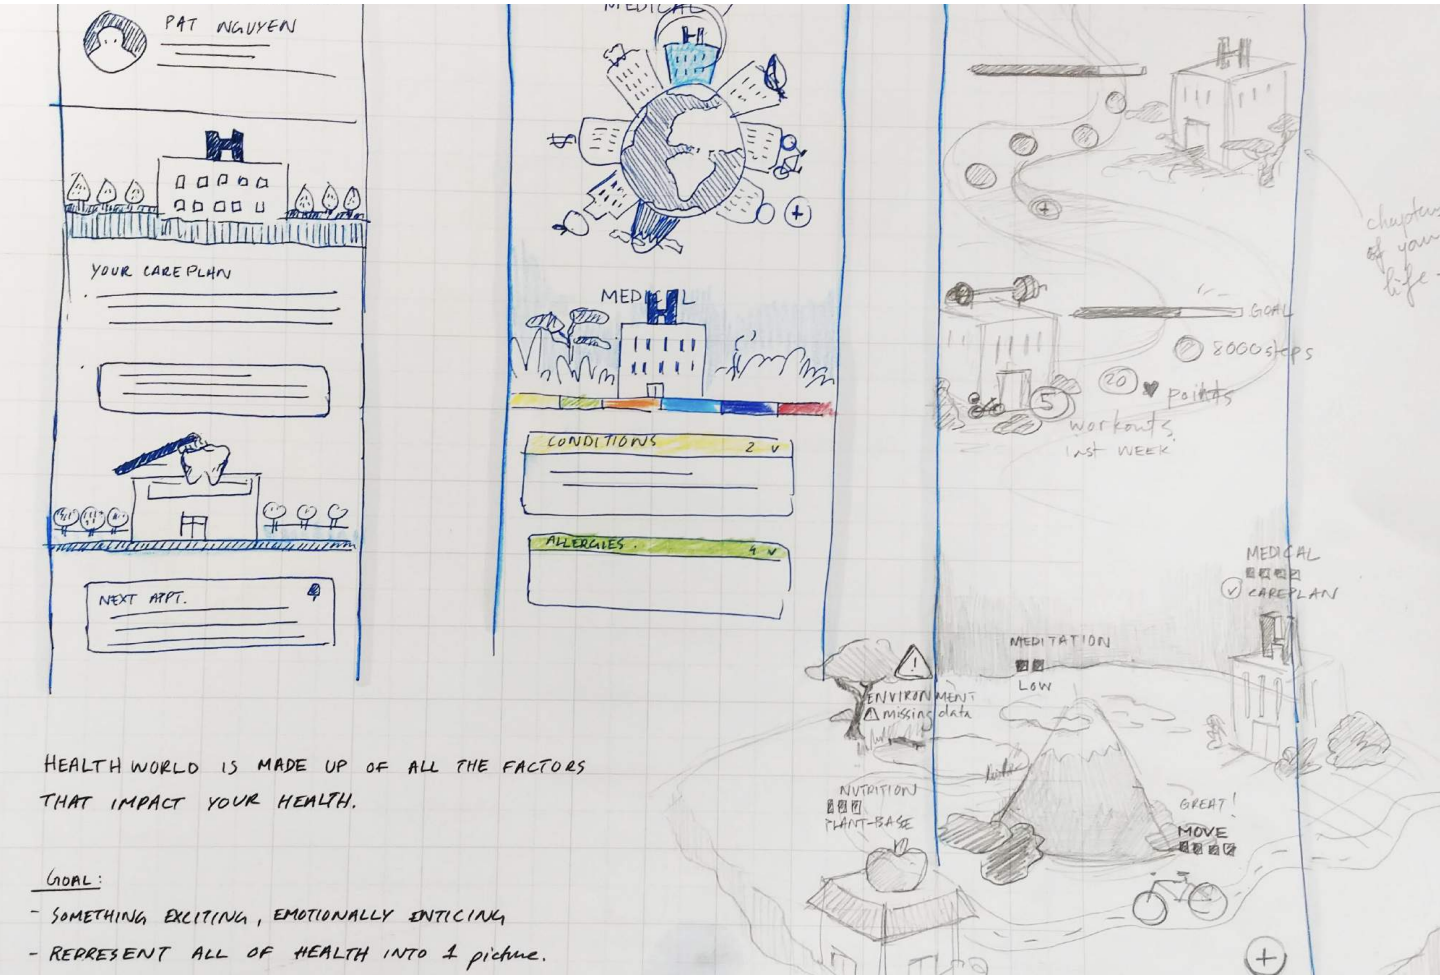

Health is made up of more than just our medical records.
It's our lifestyle, our food, our environment...

Health world is a representation of your whole health.
Each element is represented by an object:

- Food/diet by the grocery store
- Exercise: as a bike path or gym
- Mental health as a mountain or water
- Medical as a hospital.

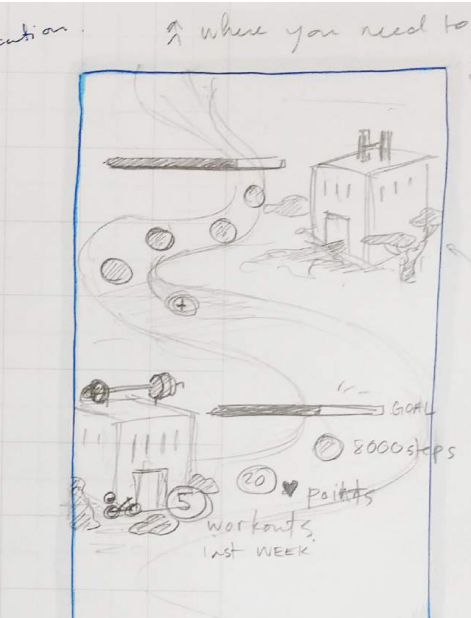

Each object serves as a hub to that health element.

JOURNEY TO HEALTH

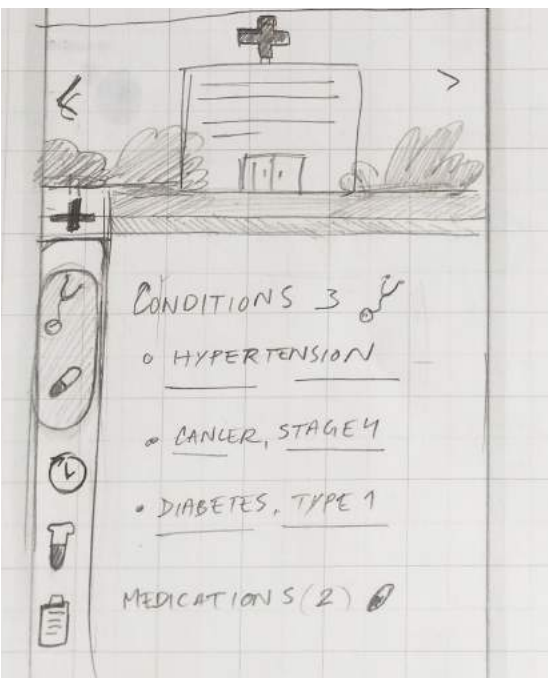

Care plans are multi-step processes. Our health can also be split divided by time.

Using a game-inspired journey map, this can show the key milestones of our health.

DETAILED VIEW

Each hub would hold all your health information in detail that you can easily scroll through/access.

SHARING

Distant worlds can represent shared connections where everyone will have unique worlds representing their unique health. .
